

# Mobile External FM Antenna

Comma Electronic Inc.

# Patent External FM Antenna

July 2009

Comma Proprietary, Patent Filed

# Features

外接FM天線

- **External FM antenna**, for most peoples who hate listening music with headset, by this product without headset the mobile phone FM radio still function well.

FM訊號強波器

- **FM Signal Enhancer**, for most type of mobile phone already embedded FM radio function inside, but the sound quality is not good enough at some place which FM signal is poor, this product helps improving signal.

耳機轉接頭

- **3.5mm Adapter**, for standard 3.5mm cellular phone headset, i.e. much cheaper, replacing the much expensive proprietary mobile phone headset.

外接喇叭

- **Audio out socket**, for external amplifier or speakers when stay indoors.

# Advantages

- Miniature Size
- Omni-Directional Antenna Pattern
- Wide Bandwidth (76~108 MHz ) cover most countries in the world
- Suitable for Japan FM radio band (76~90 MHz )
- Linear Polarization
- Cost Effective

# Compatibility

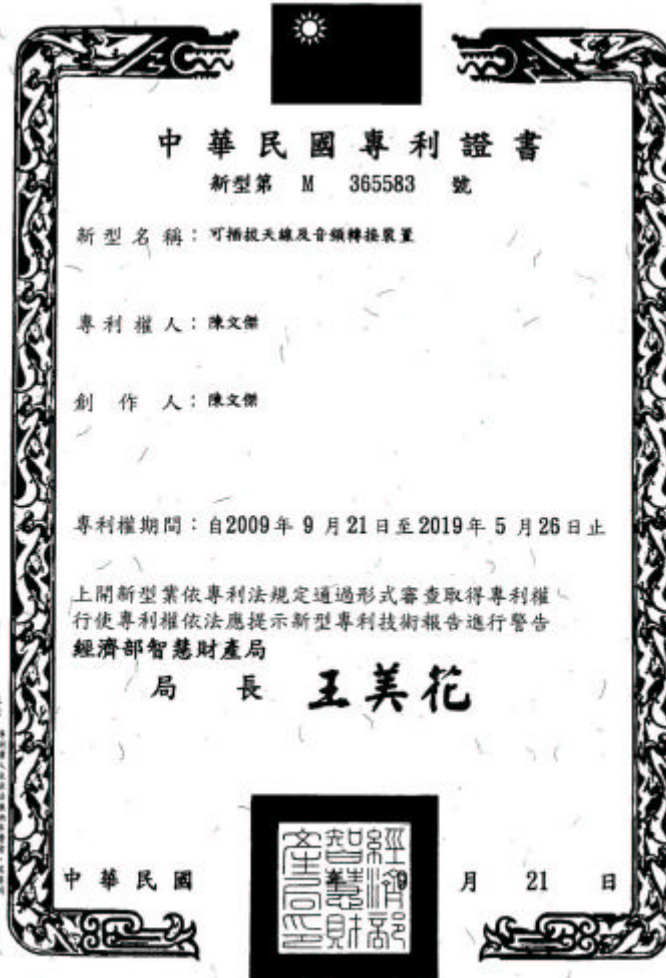

- Compatible main brands of mobile phone such as Nokia, SonyEricsson, Motorola.
- LG, Samsung opening soon.
